Use of *miniSD™ Cards*
with Rabbit-Based Devices

The following *miniSD™ Cards* were evaluated by Rabbit Semiconductor for use with RCM4300 Rabbit-Core modules and future Rabbit-based devices that support *miniSD™ Cards*, and were found to interface correctly with these devices. While other *miniSD™ Cards* may work correctly with a PC, some cards have exhibited lockup behavior under certain conditions when running in the SPI mode, which is used by the RCM4300.

Manufacturer	Memory Sizes Tested		
	256MB	512MB	1GB
Kingston	×	×	×
