

FUSIBLE METAL FILM RESISTORS

電阻式保險絲電阻

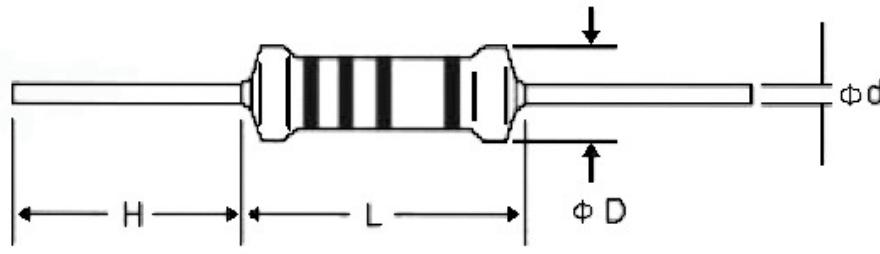

INTRODUCTION

There are some similarities between Resistor and Fuses in material and structure. Fusible Resistors contain both functions as being resistor in normal condition and changed into fuse while abnormal current comes in to protect machine and equipment. Since two functions performed by one resistor, the cost therefore saved. Fusible Resistor series are produced with precision technique, enabling precise fusing time and stabilized, aiming to reach best quality resistors.

FEATURES

- * It is suitably used in transistor protection circuit.
- * Small in size with competitive price
- * Noncombustible insulating coat. "Freon" Proof and resistant to high temperature
- * Low temperature coefficient.
- * Uniform in fusing time.

電阻器與保險絲在材質及構造上本身就有類似處，而保險絲電阻器兼備二者的功能，平時可當做電阻器使用，一旦電流異常時就發揮其保險絲的作用來保護機器設備。由於有二用的功能故成本隨之降低。本公司生產的保險絲金屬皮膜電阻器，具有高精密的製造技術，使得熔斷特性和沖激功能更臻精確及穩定，而達到更高品質性能的產品。
